PROFESSIONAL SUMMARY

Data Scientist with 3+ years of experience in marketing analytics, operational analytics, and predictive modeling. Skilled in Marketing Mix Modeling (MMM), churn prediction, CLV modeling, forecasting, attribution, and customer analytics. Delivered 40% ROI improvement through ML-driven optimization. Built 5 production-ready analytics platforms used by hundreds of users. Strong foundation in Computer Engineering and Economics.

CORE COMPETENCIES

- Marketing Mix Modeling (MMM)
- Customer Analytics & CLV
- Churn Prediction & Retention
- Forecasting & Optimization
- Attribution Modeling
- GA4 & Funnel Analytics

MARKETING DATA SCIENCE SKILLS

- MMM Bayesian - Marketing Mix Modeling with Bayesian inference
- Adstock & Saturation - Media carryover effects and response curve modeling
- Attribution Modeling - Multi-touch attribution and channel performance analysis
- Customer Segmentation - RFM analysis, clustering, and behavioral segmentation
- Churn Prediction - ML models for customer retention and early warning systems
- CLV Modeling - Customer Lifetime Value prediction and cohort analysis
- Cohort Retention - User retention analysis and engagement tracking
- Funnel Analytics - Conversion optimization and drop-off analysis
- GA4 Analytics - Google Analytics 4 implementation and event tracking
- Forecasting - Time series models (Prophet, ARIMA) for demand and trend prediction
- Optimization - Multi-objective optimization using Pymoo for campaign budget allocation

PROFESSIONAL EXPERIENCE

Operational Analytics Specialist

Suzuki Flower Farm — Aichi, Japan

2023 – Present

- Collected operational and environmental data for forecasting and anomaly detection.
- Built forecasting models (Prophet, ARIMA) for production and resource planning.
- Developed anomaly detection scripts for growth and environmental deviations.
- Automated reporting workflows for production and labor allocation.
- Supported daily operations (planting, harvesting, QC) with accurate data recording.

Impact:

- Improved production planning accuracy using time-series forecasting.
- Reduced manual monitoring time through automated anomaly alerts.
- Increased operational efficiency by identifying labor and resource patterns.

Customer Analytics & Operations Specialist (Supervisor)

Tokopedia Mitra — PT Impact Power Mandiri

2021 – 2022

- Supervised merchant onboarding and activation across assigned territories.
- Monitored activation rate, retention, funnel progression, and transaction metrics.
- Identified onboarding bottlenecks and escalated issues with structured evidence.
- Ensured SOP compliance and data accuracy in merchant registration.
- Conducted weekly performance reviews using dashboards and reports.

Impact:

- Achieved 100% project targets ahead of schedule.
- Improved merchant activation by identifying funnel drop-off points.
- Reduced operational errors through documentation standardization..

Digital Services & Customer Analytics Specialist

GrabKios Indonesia

2018 – 2020

- Collected behavioral data on agent onboarding, transactions, and product adoption.
- Identified friction points and created evidence-based hypotheses for root causes.
- Monitored campaign performance and adoption metrics at field level.

- Conducted structured interviews and user behavior observations.
- Logged operational issues with categorization and frequency tracking.

Impact:

- Improved agent activation and retention through behavioral insights.
- Reduced operational friction by surfacing high-frequency issue clusters.
- Contributed insights that improved onboarding flows and support processes.

Earlier Experience

Agricultural Project Leader — PT 8Villages (2017–2018)

Agricultural Operations Specialist — Yamasa no Niwa, Japan (2022–2023)

Organic Agriculture Instructor — Kodim Pesisir Selatan (2015)

Technical Trainee — PT Fujikikou Japan (2009–2012)

FEATURED PROJECTS

TECHNICAL PROJECTS (SELF-INITIATED)

Marketing Analytics Platform (2023–2024)

Technologies: Python, Scikit-learn, Pandas, Plotly, Streamlit

- Built unified marketing dashboard integrating MMM, segmentation, and predictive ROI analytics.
- Delivered 40% ROI improvement through ML-driven targeting.
- Automated reporting workflows, reducing analysis time by 60%.

Marketing Mix Modeling & Customer Analytics Suite (2024–2025)

Technologies: Bayesian MMM, GA4, Prophet, Pymoo, PostgreSQL

- Developed Bayesian MMM with adstock and saturation for budget optimization.
- Implemented GA4 event tracking, funnel analysis, and cohort retention.
- Built churn prediction (85% accuracy) and CLV modeling frameworks.
- Created multi-touch attribution for channel performance analysis.

AI Forecasting & Optimization System (2024–2025)

Technologies: Prophet, ARIMA, TensorFlow, REST APIs

- Built forecasting models for demand prediction and trend analysis.
- Developed multi-objective optimization using Pymoo.
- Implemented real-time retraining pipeline for continuous updates.

Agrisensa Intelligence Platform (2024–Present)

Technologies: Python, GCP, BigQuery, Streamlit, Folium

- Built platform with 20+ AI modules for forecasting, anomaly detection, and optimization.

- Achieved 99.5% uptime and supported 1,000+ active users.
- Integrated GIS dashboards and real-time data feeds.

Resource Optimization & Geospatial Platform (2024–2025)

Technologies: GIS, Folium, Plotly, PostgreSQL

- Built optimization and predictive maintenance modules for mining operations.
- Developed geospatial dashboards for operational monitoring.
- Improved operational efficiency by 30%.

EDUCATION

Bachelor of Science in Computer Engineering (In Progress)

UTEL University, Mexico — Expected 2026

Bachelor of Economics (In Progress)

Universitas Terbuka Indonesia — Expected 2027

CERTIFICATIONS

- **JLPT N3 - Japanese Language Proficiency Test**
- **Technical Training - Japan (3 years)**
- **Organic Agriculture Instructor Certification**
- **Apostille Credential (pending)**

TECHNICAL SKILLS

Programming & ML: Python, TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV

Marketing Analytics: MMM Bayesian, Adstock, Attribution, GA4, Funnel Analytics

Forecasting & Optimization: Prophet, ARIMA, Pymoo, Time Series Analysis

Cloud & Infrastructure: GCP, AWS, BigQuery, Vercel, Heroku, Docker, CI/CD

Data Engineering: ETL Pipelines, Data Warehouse, PostgreSQL, SQL, Real-time Analytics

Visualization: Streamlit, Plotly, Folium, Data Visualization Dashboards, Altair

Geospatial: GIS, Geospatial Analysis, Interactive Mapping

API Development: REST APIs, API Integration, ETL Processes

LANGUAGES

Indonesian: Native

English: Professional Working Proficiency

Japanese: JLPT N3 (Intermediate)

ADDITIONAL INFORMATION

- Open to relocation and visa sponsorship
